

Worldwide, diseases of the liver are being increasingly recognized as a cause of ill health in adults as well as children. On the other hand effective measures to prevent, diagnose & treat them have now been developed. In India there is a general lack of awareness about liver disease, especially in children who hence suffer from delayed or missed diagnosis as well as lack of access to appropriate treatment options

With this background, a group of concerned individuals which also include medical professionals and parents have decided to set up this foundation to primarily create awareness on liver disease in children. Towards this end the foundation proposes to

- ✎ Spread awareness about paediatric liver disease amongst medical professionals and the public through lectures, educational material, website and other activities
- ✎ Promote research into paediatric liver disease common in India
- ✎ Support children with liver disease and their families
- ✎ Support and promote liver transplantation as one of the treatments of liver disease
- ✎ Support setting up of investigation and treatment facilities for children with liver disease
- ✎ Collaborate with other organizations working in related fields

## FOUNDING TRUSTEES

**YK Amdekar**

Pediatrician

**Armaity Amin**

Family Physician

**Rashmi Gapchup**

Pediatrician

**Vaman Kadam**

NGO Activist

**Jaisinh Mariwala**

Industrialist and Philanthropist

**Aabha Nagral**

Hepatologist

**Sanjay Nagral**

HPB Surgeon

**Alpa Seth**

Structural Engineer

**Vilas Unawane**

Management Consultant

## HOW CAN YOU HELP US?

- ✎ Volunteer to work for our patient support group
- ✎ Popularise our website
- ✎ Donate to the foundation (we are registered under the public trust act)
- ✎ Introduce us to other like minded organizations
